Dimitar Daskalov

Software Developer

Hi there! I am a Front End Developer specializing in React, dedicated to crafting seamless user experiences. Skilled in JavaScript, TypeScript, and popular testing libraries like Jest. Eager to be in an environment, where I can expand my knowledge and grow as a professional.

PROFESSIONAL EXPERIENCE

Software Developer (Front End)
MentorMate Bulgaria ⤢

03/2023 - Present   *Sofia, Bulgaria*

Achievements/Tasks

- I am currently working as a Front End software developer for a social media platform project.
- My responsibilities include utilizing technologies such as React, TypeScript, React Testing Library, Chakra UI, and Jest to develop the user interface and ensure a user-friendly design and optimal functionality.
- The project follows Agile methods and employs tools like Jira and Confluence.

Junior Software Developer (Full Stack)
MentorMate Bulgaria

04/2022 - 03/2023   *Sofia, Bulgaria*

Achievements/Tasks

- I worked for an american client e-commerce platform project.
- Encompassing Front End technologies including React, JavaScript, TypeScript, React Testing Library, and Jest.
- As well as Back End technologies such as Python, Django REST Framework, and Unit Testing.

Software Development Trainee
MentorMate Bulgaria

02/2022 - 03/2022   *Sofia, Bulgaria*

Achievements/Tasks

- Completed Mentormate DevCamp (University) - Python

EDUCATION

MentorMate DevCamp (University) - Apprenticeship
MentorMate Bulgaria (University) ⤢

02/2022 - 03/2022   *Sofia, Bulgaria*

Courses

- Over the course of two months, I underwent focused training in Python, Django, MySQL and Unit Testing with the guidance of a mentor. The program culminated in the successful completion of a Django Rest Framework API project and a job offer as a Junior Software Developer.

Python Web Development
Software University (SoftUni) ⤢

06/2020 - 05/2021   *Sofia, Bulgaria*

Courses

- Intensive training in Python programming language with focus on Web Development. Including OOP Principles and language specifics.
- The final course task included building a fullstack web project using Django framework, PostgreSQL and Bootstrap 4. Following the MVT (Model, View, Template) design pattern as well as deployment in Heroku.
